HUGINN

Huginn is a great fusion between high fidelity & eSport – built to perform at a high level and deliver crystal-clear sound quality for gamers - as well as for passionate music fans. The flexible and detachable noise-cancelling boom microphone is super accurate. Unwanted hiss & noise will be filtered to give high transparency and a crisp natural voice when speaking. Huginn supports digital 7.1 sound as well as analogue 2.0 sound.

The 50mm neodymium audio speakers are built to deliver perfection and a 360-degree quality sound experience – regardless, if you chose to connect to a digital source (USB-A to USB-C cable) or from an analogue source (3.5mm to 3.5mm jack cable).
Both cables, which are included, are detachable and made of braided tangle-free materials. The analogue cable even has an anti-pull-twist-lock functionality to prevent the cable from accidently being pulled out.

The pillow-soft pressure relief protein cushions will isolate & ventilate at the same time. The solid metal hinges and protective metal cup-grids provides stability, which will reduce wear & tear over time.
The cushioned adjustable headband brings additional comfort to your precious moments, whether you chose to play games or listen to your favorite music.

Easy-to-access volume adjuster and mute button are located on the backside of left side cup.
Huginn comes in an exclusive luxury hardcase storage packaging.

MUNINN

Muninn is an amazing wireless 2.4 GHz fusion between high fidelity & eSport – built to perform at a high level and deliver crystal-clear sound quality for gamers - as well as for passionate music fans. The flexible and retractable noise-cancelling boom microphone is super accurate. Unwanted hiss & noise will be filtered to give high transparency and a crisp natural voice when speaking.

The 50mm neodymium audio speakers are built to deliver perfection and a 360-degree quality sound experience – and being wireless gives you the freedom to move around without having any disturbing cables hanging everywhere. Simply plug the transmitter into a vacant USB slot on your gaming/music device and you will be ready to go within seconds. The built-in battery is charged, when you connect the headset to your device, using the included charging cable.

The pillow-soft pressure relief protein cushions will isolate & ventilate at the same time. The solid metal hinges and protective metal cup-grids provides stability, which will reduce wear & tear over time.
The cushioned adjustable headband brings additional comfort to your precious moments, whether you chose to play games or listen to your favorite music.

Easy-to-access on/off, volume adjuster and mute button are located on the backside of left side cup.
Muninn comes in an exclusive luxury hardcase storage packaging.
